Subject: West Valley Sand & Gravel - Daniels Canyon Pit - M/051/008

Hi Mr. Dykman:

We received a new Large Mine Notice in Wasatch County. This is an existing disturbance that has been mining sand & gravel and is now into bedrock, thus requiring a notice be submitted to us.

The Project is located in:
SW1/4 of N1/2 of Section 27 and
SW1/4 of S1/2 of Section 22
Township 4 South, Range 5 East
Wasatch County, Utah

The UTM's show as: 468,967 E 4,477,866 N

I have scanned the map only for your review. The LMO application is very large - if you need anything from it, please let me know but we felt the map may be all you needed to do your archaeological review.

Thank you for your timely assistance.
Joelle

p.s. if the map and legal location is all you need for your reviews, please advise so that is all I will send you in the future.
